ABSTRACT. This work is on design and construction of a 1.5KVA solar energy generator. Solar energy generator and also be called solar inverter. Solar energy generator converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid ...

This paper focuses on the design and implementation of 1.5kVA 12V DC, 230V AC Solar-powered mobile inverter. The basic principle of operation is the conversion of 12V DC from a 200Ah Deep cycle battery using integrated circuits SG3524 and semiconductors at a frequency of 50Hz, into a 230V AC across the windings of a transformer.
