

Adden Energy is developing solid-state batteries for automotive and consumer applications and is located in the Boston Area. Our technology is based on leading research from Harvard University and our team is backed by prominent venture capital investors. ... Develop battery material mixing & coating processes including tooling, equipment, and ...

Adden Energy is developing sulfide solid-state batteries for automotive and consumer applications and is located in the Boston Area. Our technology is based on leading research from Harvard ...

Adden Energy, Inc. - a startup developing innovative solid-state battery systems for use in future electric vehicles (EVs) that would fully charge in minutes - has announced the grant of an exclusive technology license by ...

Adden Energy has developed lithium-metal solid-state battery technology. To scale production and bring this technology to car manufacturers, the company has raised \$15 million in a Series A round led by At One Ventures. Primavera Capital Group, Rhapsody Venture Partners, and MassVentures also participated. The funding will be used to construct a roll-to ...

Adden Energy's next-generation battery technology combines lithium metal and fast charging capabilities to address the limitations of current EV batteries. The company's solid-state batteries, originally developed at Harvard, utilize a self-healing separator to eliminate lithium dendrite growth--a primary cause of battery failure.

Adden Energy, Inc. - a startup developing innovative solid-state battery systems for use in future electric vehicles (EVs) that would fully charge in minutes - has announced the grant of an exclusive technology license by Harvard University's Office of Technology Development (OTD) and a seed round financing of \$5.15 million. Primavera Capital Group led ...

Adden Energy is one among many solid state battery innovators to overcome the ion movement hurdle, and they have also come up with a vigorous solution to the problem of dendrite formation, to boot ...

The Harvard University subsidiary Adden Energy received \$5.15 million in funding to advance the battery technology after successfully exhibiting a coin-cell prototype with charge rates of three minutes and more than 10,000 cycles in a lifetime. According to the Independent, Adden Energy hopes to commercialize the technology soon. Furthermore, it ...

Adden Energy is a relatively new entrant in the battery industry, making waves with its innovative approach to battery technology. Founded by a team of experts with deep roots in both academia and ...

Adden Energy | LinkedIn ??? 2,277? | A Harvard University spin-off commercializing novel solid-state battery technology | The problems posed by climate change need no introduction - it is one of the most pressing challenges of our era. Rapid development of clean energy storage technology is critical to combating this plague. In fact, electrification of the world's vehicle fleet ...

Adden Energy, a company specializing in lithium-metal solid-state battery technology, has raised \$15 million in a Series A funding round led by At One Ventures. The investment aims to scale production and bring the company's innovative battery solutions to electric vehicle (EV) manufacturers, addressing critical challenges such as range ...

Cambridge, Mass. -- September 1, 2022 -- Harvard's Office of Technology Development has granted an exclusive technology license to Adden Energy, Inc., a startup developing innovative solid-state battery systems for use in future electric vehicles (EVs) that would fully charge in minutes. Adden Energy has closed a seed round with \$5.15M in funding led by Primavera ...

Harvard's Office of Technology Development has now granted an exclusive technology license to Adden Energy. Adden Energy has closed a seed round with \$5.15 million in funding led by Primavera Capital Group, with participation by ...

The battery retained 80% of its capacity after 6,000 cycles, outperforming other pouch cell batteries on the market today. The technology has been licensed through Harvard Office of Technology Development to Adden Energy, a Harvard spinoff company cofounded by Li and three Harvard alumni. The company has scaled up the technology to build a ...

Adden Energy, an American battery company founded in 2021, develops innovative solid-state battery systems for use in future electric vehicles (EVs). The battery can fully charge in just 3 min with over 10,000-lifetime cycles. Adden Energy's next-gen battery technologies are designed to combat climate change and achieve breakthroughs in the EV ...

The start-up Adden Energy, founded by scientists at Harvard University, is developing a new type of solid-state battery for electric vehicles and has now announced that it has received a technology licence and closed a ...
