

What is the energy supply in Iceland?

In terms of total energy supply, 85% of the total primary energy supply in Iceland is derived from domestically produced renewable energy sources. Geothermal energy provided about 65% of primary energy in 2016, the share of hydropower was 20%, and the share of fossil fuels (mainly oil products for the transport sector) was 15%.

Who produces electricity in Iceland?

There are three main electricity producers: Landsvirkjun, which is state-owned; Reykjavík Energy, owned by three municipalities; and HS Energy, owned by local municipalities and private investors, some of whom are foreign. There is a nascent wind power sector and some interest in developing solar power, especially for off-grid uses.

Does Iceland produce hydroelectric energy?

Iceland is the first country in the world to create an economy generated through industries fueled by renewable energy, and there is still a large amount of untapped hydroelectric energy in Iceland. In 2002 it was estimated that Iceland only generated 17% of the total harnessable hydroelectric energy in the country.

Does Iceland collect data on energy?

Statistics Iceland does not collect data on energy but has published energy figures since 1960. The National Energy Authority (NEA) collects monthly data on energy consumption, capacity, generation and sales of energy and electricity and oil use.

Does Iceland use geothermal energy?

In 2013 Iceland also became a producer of wind energy. The main use of geothermal energy is for space heating, with the heat being distributed to buildings through extensive district-heating systems. About 85% of all houses in Iceland are heated with geothermal energy. In 2015, the total electricity consumption in Iceland was 18,798 GWh.

What percentage of Iceland's energy is renewable?

About 85% of the total primary energy supply in Iceland is derived from domestically produced renewable energy sources. This is the highest share of renewable energy in any national total energy budget.

OverviewSourcesEnergy resourcesExperiments with hydrogen as a fuelEducation and researchSee alsoBibliographyExternal linksIn 1905 a power plant was set up in Hafnarfjörður, a town which is a suburb of Reykjavík. Reykjavík wanted to copy their success, so they appointed Thor Jenssen to run and build a gas station, Gasstæði Reykjavíkur. Jenssen could not get a loan to finance the project, so a deal was made with Carl Francke to build and run the station, with options for the city to buy him out. Construction started...
