

What is akkugrain?

AkkuGrain is the first protective agent specially developed for the transportation and storage of lithium-ion batteries. Made from purely organic components, AkkuGrain only reacts in the event of a thermal runaway. Curious? Ask your questions here! When heat is released, the components of the AkkuGrain bind toxic and flammable gases.

Is akkugrain a combustible material?

AkkuGrain is officially certified and patented as a non-combustible material. AkkuGrain ensures a temperature reduction in the event of a thermal runaway due to its composition. Due to its low specific density, AkkuGrain is light, approx. half the weight of sand

What is akkugrain granulate?

Environmentally friendly AkkuGrain granulate absorbs emerging liquids, toxic smoke and burning gases. Damaged vehicles can be saved and stored without further supervisory staff. Development vehicles can be transported invisibly and without problems. The containers can be secured with a seal or a lock.

What can akkugrain do for You?

AkkuGrain is available in different bag sizes and as bulk material. As a manufacturer, we offer you complete solutions for the transportation of lithium-ion batteries. At your request, we can also develop individual solutions for lithium-ion batteries, regardless of whether they are new, defective or critically damaged.

Can akkugrain be reused?

AkkuGrain can be reused as often as desired after transport without thermal runaway. AkkuGrain is available in different bag sizes and as bulk material. As a manufacturer, we offer you complete solutions for the transportation of lithium-ion batteries.

A pesar de que el ALCA no ha sido aprobado todavía por nuestro congreso ni por nuestro pueblo, el gobierno e instituciones bancarias como el Banco Interamericano de Desarrollo (BID), la Corporación Andina de Fomento (CAF) y otras, han empezado a establecer las venas por las cuales va a circular el ALCA. En otros lugares, como en Centroamérica y México, estas venas ...
