

What is evyon battery energy storage?

Evyon provides a modular DC battery energy storage solution based on repurposed EV batteries for system integrators to integrate into a range of solutions. Scalable to fit your needs. Online-connected to maximize safety, performance, and longevity.

Does evyon use repurposed EV batteries?

Sustainability Evyon uses only repurposed EV battery modules, which reduces the carbon footprint by up to 85% compared to new systems. Quality Evyon Industrial uses brand-new, Tier 1 EV battery modules from a leading German car manufacturer and a BMS based on 15 years of experience.

Who makes evyon industrial batteries?

Evyon Industrial is built using batteries from a leading German car manufacturer to ensure our systems are of the highest quality and safety in the industry. In addition to the battery cells themselves, Evyon uses a well-proven BMS from a manufacturer with more than 15 years of experience.

Does evyon have a battery cloud?

Evyon's solution includes a "Battery Cloud", an online platform where users can monitor their own battery system. This gives real-time and historical insight about the system, such as voltage and current. "Using our Battery Cloud, users can be sure that the batteries are safe and reliable for their entire lifespan," says Erdal.

How does evyon industrial work?

Evyon Industrial scale from kWh to MWh while working with inverters from 0 to 1000 V DC. Through our Battery Cloud Platform, we use state-of-the-art battery and data science capabilities to maximize the safety, performance, and lifetime of your battery system.

How long does it take evyon to deliver a battery system?

Evyon can deliver its battery systems in three to four months, compared to six to nine months for new battery systems. Evyon is a dynamic new player in the global stationary battery storage market, which is expected to reach USD 140 billion by 2030.

Evyon has raised over EUR10 million to-date and has secured access to 40MWh of battery modules for delivery to customers during 2023, Groen says. Octave for its part is targeting 7MWh of deployments over the ...

Evyon delivers high-quality battery energy storage systems based on repurposed EV batteries and novel technologies for reassembly. Evyon's approach converts usable second life EV batteries into modular plug-and-play battery storage ...

How do you support Evyon in your role as a Battery Scientist? "I am leading the development of our analytics/data-driven platform. In this scenario, I am providing battery expertise, leveraging data from our characterization lab through the construction of digital twins and artificial intelligence methods. This framework aims to maximize the ...

Evyon's proprietary hardware and Battery Cloud ecosystem enable the conversion of spent EV batteries into high-quality, affordable, and plug-and-play battery energy storage systems. The company's ambition is to become European-leading in reused batteries by 2025, and world-leading by 2030.

Evyon closed its fourth investment round on November 1st, led by the impact focused venture capital firm Sandwater, and joined by Antler, Wiski Capital and... | 17 kommentarer på LinkedIn Evyon on LinkedIn: Norwegian second-life EV battery start-up Evyon raises EUR7M in ...

Evyon's Battery Cloud adds 24/7 cloud monitoring to observe trends and anomalies not detectable by the BMS. In the unlikely event that a cell would catch fire, our proprietary integrated fire suppression system effectively stops cell-to-cell propagation which drastically limits the risk to you as an integrator.

Great news ? Evyon is one of the 3 winners of the 2022 PRIO Jump Start open innovation program! As part of this, Evyon and PRIO will now collaborate on a pilot project where an Evyon Battery system enables a 150 kW EV fast charger without grid upgrade? Read more about our latest achievement on our website: <https://lnkd /d9mvrKc3 #energystorage>

Evyon has 5 employees at their 1 location and kr867 k in annual revenue in FY 2021. See insights on Evyon including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft. ... Evyon is a developer of battery energy storage systems. It develops novel technologies for reassembly and operations to convert ...

Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing, making repurposed battery systems both ...

Evyon repurposes second-life EV batteries into green battery systems for residential and commercial use. The battery systems can be used for a wide range of stationary storage applications, from peak shaving to storage ...

Evyon develops novel technologies to repurpose second-life EV batteries into modular battery energy storage systems in a streamlined, safe, and cost-effective way. Using second-life EV batteries, Evyon estimates its battery systems to ...

Evyon will supply M øller Eiendom with a 200 kWh industrial BESS plus Energy Management System (EMS) that will control the charging and discharging of the battery for maximum value creation. By choosing

a ...

Evyon's approach converts usable second life EV batteries into modular plug-and-play battery storage systems that are streamlined, safe and cost-effective. Since its founding, this young company has shown remarkable growth and ...

Evyon has joined forces with Batteriretur to maximize the value of spent industrial batteries together. The companies have signed a Memorandum of Understanding (MoU) outlining the intention to work together to convert ...

Evyon closed its fourth investment round on November 1st, led by the impact focused venture capital firm Sandwater, and joined by Antler, Wiski Capital and Skagerak Energi. ???Sandwater

Companies in the space are already saying that thanks to the variety of uses cases of a BESS it is possible to start planning for "third life" systems, as Ralph Groen chief commercial officer of Norway-based Evyon, one such company which raised EUR8 million (US\$8.21 million) in a Pre-Series A last week, explained. "You can use it at its full state of health for e ...
