Multi-Building Group Feature. The new Multi-Building Group feature in the BIM Energy Renovation module allows users to combine multiple buildings into a single project for a more comprehensive energy analysis on the entire ...

BIM Energy calculation software is an important support app used for building designers & engineers to find ways of reducing the amount of energy used in buildings. By using BIM Energy to determine the energy performance, it supports the engineers to make decisions about the best measures to apply for any existing building or in an early phase. ...

This study adds to the body of knowledge about BIM application in Nairobi, Kenya that is beneficial to developers, architects, engineers, quantity surveyors, project managers, contractors, and...

The energy balance of emitted and supplied energy in BIM Energy simulation software is calculated hour by hour during the year, based on User inputs about the building. The hourly calculations are then accumulated into yearly ...

This paper concludes that BIM success is dependent on close collaboration between the client, consultants, contractors, and suppliers along with the establishment of a well-developed BIM protocol and the lessons learnt from the UK can easily be used by Kenya as it embarks on its BIM journey for an efficient and harmonious working environment in ...

Kenya's Growing Leadership in Renewable Energy Kenya has long been at the forefront of renewable energy in Africa, with more than 70% of its electricity generated from renewable sources like geothermal, wind, and solar. In 2024, the country is pushing further into this space, particularly in off-grid solar solutions and energy storage ...

BIM Energy is an application that calculates a building's energy performance. The dynamic core quickly calculates the energy balance of the building hour by hour, for a complete year. It also takes the thermal inertia of the building into ...

The main aim of this paper was to establish the effect of Building Information Modelling (BIM) in the management of construction projects risks in Kenya. The study target population is 462 registered consulting architects and engineers ...

BIM Energy Renovation provides you with comprehensive building energy project management module designed to allow you to organise, manage and consider the energy performance of an entire property portfolio.. The user-friendly interface and robust project management features make it an essential resource for property managers, HVAC contractors and real estate ...
