

Can solar power be used in Bolivia?

In the case of the Bolivian remote highlands, off-grid PV-battery systems are often used since the grid is too expensive to expand. High solar radiation in the region, up to 6kWh/m²/day, provides a practical and economic advantage of using PV technology.

How can Bolivia improve energy production?

Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN), which the government has put in place, aims to improve the nation's capacity for producing electricity by building additional power plants, transmission lines and substations.

Is Bolivia part of RELAC?

For instance, Bolivia is part of RELAC, an alliance between Latin American and Caribbean countries for renewable energy development. One of its aims is for renewable energy to reach 70% of the regional electricity matrix.
