

Business tax rate for solar power generation

Are commercial solar panels taxable?

Business rates for commercial solar panels are a thorny topic, and well worth being aware of at an early stage. In April 2017, the government revalued self-owned PV systems as a taxable asset. For some companies, this meant an increase in business rate bills. Solar valuations are now split into two types:

Will solar energy be exempt from business rates from April 2022?

Data source: Solar Energy UK. The good news is that after much industry lobbying, the government has now announced that solar PV, energy storage and renewable technologies will be exempt from business rates from April 2022. In the meantime, Solar Energy UK recommends a workaround:

Are solar panels liable for business rates?

However, under subsequent amendment regulations, where power is generated for "sale to consumers", the associated plant becomes exempt. This can produce somewhat unexpected results - for instance, where solar panels installed on a shop roof for self-consumption are liable for Business Rates, the power, if sold on, is not.

Are all solar PV generating assets subject to business rates?

1. Are all solar PV subject to business rates? Non-domestic solar PV generating assets are rateable, however the Business Rates applied can vary considerably on the circumstances of its use: whether the site is set up as for 'mainly export' or 'mainly self-consumption'. The test applied is whether more than 50% of the power produced is exported.

Are solar panels tax deductible?

It is the fact that the solar panels are rateable assets where they are used for on-site consumption and assessed with the host site that leads to significantly higher Business Rates per unit of generation capacity. This unfair tax treatment can only be rectified through legislative change.

Are self-owned solar systems taxable?

In April 2017, the government revalued self-owned PV systems as a taxable asset. For some companies, this meant an increase in business rate bills. Solar valuations are now split into two types: Mainly export - the PV system is set up to export power (e.g. a solar farm or PPA installation).
