

How will ADB support Cambodia's solar sector?

The mandate builds on ADB's earlier support to Cambodia's solar sector, including through the country's first National Solar Park located in Kampong Chhnang, which will generate up to 100 MW of solar power. The program will also build on BESS projects implemented by EDC with technical and financial assistance provided by ADB.

Does Cambodia need a solar power plan?

The mandate builds on ADB's previous support for Cambodia's solar sector, which included a 100MW National Solar Park located in Kampong Chhnang. Cambodia's Power Development Masterplan also underlines its potential to increase its solar energy generation capacity, which is expected to exceed 3GW by 2040.

Why is Cambodia developing 2 gigawatts of solar power?

The development of 2 gigawatts of solar power is in line with the strategy of the Cambodian government to meet its growing energy demand by maximizing the adoption of renewable energy and energy efficiency.

How can ADB support a green energy transition in Cambodia?

"ADB is pleased to support a green energy transition in Cambodia that will promote clean, sustainable, and inclusive economic growth through policy reform in energy planning and governance, improving grid stability, and energy efficiency," said ADB Country Director for Cambodia Jyotsana Varma.

What are the implications of Cambodia's Power Development Plan?

Cambodia's Power Development Masterplan also underlines its potential to increase its solar energy generation capacity, which is expected to exceed 3GW by 2040. What are the implications of BP's strategy shift to focus on the traditional oil and gas business rather than renewable energy? Power Poll# 59 - BP strategy shift implications.
