

Can a fish tank be placed in an ordinary locker

Where should a fish tank be kept?

You should keep your tank somewhere accessible. It must be in a place that's easy for you to reach. You definitely don't want your aquarium to be encased or tucked away on a tall shelf. There should be enough space for you to reach around the sides and in the back of the aquarium.

How to keep a fish safe in an aquarium?

But you can't compromise on any of these if you want your tank and the fish to be safe. To sum it all up, you should keep your aquarium in a quiet, low-traffic area with constant temperature and good ventilation. The aquarium should also be perfectly level and the floor should be strong enough to support its weight.

How to set up a fish tank?

Now, you're ready to set up your fish tank! Next, choose a suitable location for your aquarium: Don't put the aquarium in direct sunlight. That encourages algae growth and could make the water too warm. Avoid heat sources and drafts. Choose level ground so that the tank doesn't fall over.

How to set up a fish tank with live plants?

Put the tank on the aquarium stand, and pour in the substrate. Place the filter and heater in the tank, and add decorations to hide the equipment. Fill the aquarium with room temperature water and dose the dechlorinator. Plant the aquarium plants. Follow this guide for steps on how to set up a fish tank with live plants.

How to keep a fish tank in a dark room?

It's best to keep your tank in a darker room and use aquarium lights throughout the day. You might be tempted to put your aquarium somewhere where you can conceal all the blocky equipment like filters, lights, air pumps, and so on. However, this will only make your job harder in the future.

Does a fish tank table need a strong floor?

However, even with a specialty fish tank table, your home's floor must also be strong enough to support the weight of your aquarium. This is especially true with large, heavy aquariums. Some floors are also uneven, which can cause the stand and aquarium to twist under its own weight.
