

Can photovoltaic panels be installed in housing

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can solar panels be installed without planning permission?

Solar panels need to receive ample sunlight throughout the day and where possible should not be obstructed by shading from trees or other buildings. Most residential properties in the UK can have solar panels installed without planning permission as they are considered to be a 'permitted development'. The exceptions are:

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Are solar photovoltaic panels part of a default package?

Solar photovoltaic (PV) panels are expected to be part of a default package to meet forthcoming rules on the energy efficiency of homes and buildings in England, according to Government plans.
