Is Maine a good place to install solar panels?

Many Maine residents don't realize how many exceptional local solar companies they have access to. In fact, despite being one of the least sunny states in the country, Maine is near the top of the list when it comes to solar growth, especially in residential and community solar installations.

Is SunPower a good solar company?

SunPower is a giant in the solar industry. The company was founded more than three decades ago, in 1985, and continues to be one of the leading solar panel companies in the field today. The company's Maxeon panels are the most efficient available, boasting state-of-the-art photovoltaic technology and unparalleled durability.

Do solar companies offer PPAs or leases?

Some solar panel companies offer PPAs and solar leases, which may seem attractive due to their low upfront costs but lead to lower lifetime savings. We don't recommend PPAs or leases and advise new solar customers to choose a solar loan if they can't afford to pay for their panels in cash. Do They Contract Installation?
