

Who is Centrica Energy?

Centrica Energy is our global energy trading and logistics arm. We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches.

How long will Centrica's nuclear power stations last?

Credit: Christian Schwier/Shutterstock. Centrica, in partnership with EDF, has announced the extension of the operational lives of its four advanced gas-cooled reactor nuclear power stations. The extensions will see Heysham 1 and Hartlepool generating electricity until March 2027, while Heysham 2 and Torness will continue until March 2030.

How will Centrica's terawatt extension affect UK power generation?

These extensions will add 9TWh [terawatt hours] to Centrica's electricity generation volumes between 2026 and 2030. The move supports the UK's baseload power generation, aligning with the country's net zero ambitions and maintaining grid stability amid increasing renewable energy integration.

Why is Centrica group extending its nuclear fleet?

Centrica Group chief executive Chris O'Shea stated: "At a time when energy security is uppermost in people's mind, I'm delighted that we're able to extend the operating window of the UK's nuclear fleet, which is critical to UK security of supply and the country's net zero ambitions.

What international contracts have been signed to improve Iraq's electricity infrastructure?

Several international contracts have been signed to enhance Iraq's electricity infrastructure: General Electric (GE): GE has a US\$3 billion contract to provide multi-fuel gas turbines capable of supplying 7,000 MW of electricity.

Why is Centrica extending the operating window of the UK's nuclear fleet?

Chris O'Shea, Centrica Group Chief Executive said: "At a time when energy security is uppermost in people's mind, I'm delighted that we're able to extend the operating window of the UK's nuclear fleet, which is critical to UK security of supply and the country's net zero ambitions.

Bill Rees, director of Centrica Energy Assets, said: "Centrica has committed to reaching Net Zero by 2045 and this marks a key milestone in the company's drive to tackle the effects of climate change. We must make full use of the natural resources available to us in order to deliver a clean, green, renewable energy future for the UK."

Sir Roy Gardner, Chief Executive of Centrica, said: "Faced with a volatile wholesale energy market and a

predicted reduction of power generation sources in the UK over the coming years, this major investment signals Centrica's commitment to secure the future energy needs for our British Gas customers."
