

China Southern Power Grid's poverty alleviation microfilm

What is photovoltaic poverty alleviation in China?

As a part of an environmentally concerned development strategy, the photovoltaic poverty alleviation in China is adopted to lift households above the extreme poverty line by 2020.

Who proposed photovoltaic poverty alleviation projects in China?

The photovoltaic poverty alleviation projects and corresponding procedures were proposed in China in 2015 by the National Energy Administration and the State Council Leading Group Office of Poverty Alleviation and Development.

Can photovoltaic energy help alleviate poverty in China?

Since the photovoltaic industry has developed dramatically in recent years, China's photovoltaic poverty alleviation has the potential to take one step further in the areas of energy storage and emerging technologies to make full use of the solar energy produced (Song et al., 2015).

Will village-level poverty alleviation power stations contribute to China's photovoltaic poverty relief programme?

In the next few years, the development of village-level poverty alleviation power stations will constitute the main direction for China's photovoltaic poverty alleviation programme. The village power stations overcome several bottlenecks that have long troubled photovoltaic projects and greatly reduce project development difficulties.

Are energy poverty alleviation policies effective in China?

We examine the effectiveness of energy poverty alleviation policies in China. A text analysis is performed to quantify the energy poverty alleviation policies. Policy intensity is more effective than policy completeness. Supply-side policies perform better than demand-side and environmental policies.

Do photovoltaic poverty alleviation projects need an urgent reform?

The subsidy policies for photovoltaic poverty alleviation project in China need an urgent reform because this project is not only more dependent on subsidies but also inefficient in using subsidies. To relieve financial difficulties, we construct the investment benefit evaluation model for photovoltaic poverty alleviation projects.
