

Cidetec energy storage SÃO Tomé and Príncipe

Laboratory located in the MUBIL Centre for Electromobility and Energy Storage, with an investment of more than EUR6M in equipment, to meet the testing needs of both its own research and development projects, as well as direct requests from ...

Una referencia en el almacenamiento de la energía. CIDETEC Energy Storage tiene su sede central en el Parque Científico y Tecnológico de Gipuzkoa, en Donostia-San Sebastián, donde está ubicada la mayor parte de nuestro personal, laboratorios y equipamiento singular.

Access to Clean Resilient Electricity under the ASCENT Regional Program - Multi Programmatic Approach: Owner's Engineer for Drawing up the Tender Specifications and Supervision for Rehabilitation and Expansion of the Medium and Low Voltage Network, the Upgrading of Dispatch Center and Control System and Battery Energy Storage Solution (BESS)

National Renewable Energy Action Plan (NREAP) of São Tomé and Príncipe Page 6 of 110 INTRODUCTION The sustainable industrial and socio-economic development of São Tomé and Príncipe (STP) is heavily dependent on reforming the energy sector and transitioning from an almost complete reliance on fossil

SÃO TOMÉ, June 27, 2024 - TotalEnergies has signed an agreement to acquire a 60% interest and operatorship in Block STP02, offshore São Tomé and Príncipe, from the Agência Nacional do Petróleo de São Tomé e Príncipe (ANP-STP), the French super-major announced on Wednesday. Block STP02 is located around 60 kilometres offshore Príncipe and covers an ...

The island nation of Sao Tome and Principe switched on the initial phase of its first 2 MW solar project in August. Construction of 1.4 MW of PV capacity is now underway at two airports, and ...

This highlights the trend towards digitalisation, which has been established in the field of energy storage. Elixabete Ayerbe's presentation, entitled "Deep dive into the modelling: accelerating battery cell developments", discussed the different digitalisation techniques being developed at CIDETEC Energy Storage.

CIDETEC's proprietary software cideMOD is based on the Doyle-Fuller-Newman model in which the physicochemical equations are solved by Finite Element methods using the FEniCSx library. It enables doing physics-based battery cell (herein after cell) simulations with a wide variety of use cases, from different drive cycles to studies of the SEI growth under storage conditions.
