

2022 Cogeneration National Snapshot Survey ...representing 82% of installed capacity in EU27 & Turkey  
Expert contributions from 15 CHP national experts... ...capturing the European CHP ...

COGEN Europe's Policy Priorities 2024-2029 are set out in the document: The Role of Cogeneration in Europe's Energy Transition - Enabling an Efficient Pathway to Net Zero . Search. Search. Recent Posts.  
COGEN Europe calls on the new European Commission to boost competitiveness and cut emissions by putting energy efficiency first;

1. Cogeneration in buildings, industry and districts complements end-use electrification, ensuring lower emissions, higher integration of renewables and overall a more flexible and cost-effective energy system.. 2. The Coastal Power Plant K.I.E.L project highlights the synergies between efficient and flexible cogeneration, district heating and power markets.

COGEN Europe o The European Association for the Promotion of Cogeneration Avenue des Arts 3-4-5, 1210 Brussels, Belgium T +32 (0)2 772 82 90 | F +32 (0)2 772 50 44 | info@cogeneurope Indeed, the hydrogen projects collected by the European Commission through the Hydrogen Alliance this spring revealed that 84% of ...

COGEN Europe calls for a "smart approach" to reducing greenhouse gas emissions from homes and other buildings - COGEN Europe (15 December 2021) Energy Performance of Buildings Directive - European Commission. European Green Deal: Commission proposes to boost renovation and decarbonisation of buildings - European Commission (15 ...

PRESS RELEASE 18 July 2024 As the process of appointing a new European Commission gets underway, COGEN Europe is calling on the EU institutions to adopt a smarter and more flexible approach to the decarbonisation of Europe's energy system. In order to meet the EU's ambitious emissions reduction targets for 2040 and 2050 (i.e.

In the context of the Fit for 55 and the upcoming Green Gas Package, COGEN Europe joins industry stakeholders in calling for for a European Union (EU) policy framework that promotes the production, market uptake and system integration of renewable and decarbonised gases. The upcoming Green Gas Package will play a key role in aligning gas market regulation with the ...

COGEN Europe supports an ambitious, comprehensive and predictable legislative framework towards achieving the European Union's goal of "net zero" greenhouse gas emissions by 2050. We believe that the process of setting an emissions target for 2040 must take into account the role of energy efficient solutions and technologies, including ...

In this regard, high-efficiency cogeneration (HE-CHP) can and should play a crucial role in both decarbonising the European economy, and in the carbon-neutral world of tomorrow, being the optimal, feasible, resource-efficiency technology, maximizing primary energy savings. Through simultaneous generation of heat and electricity in the most ...

Cogeneration at the heart of European industry and communities 6 In the European Union: o Cogeneration saves 356 TWh of energy every year, equivalent to the total energy consumption of 23 million homes or the entire EU pulp & paper sector<sup>1</sup>. o Cogeneration prevents approximately 200 million tonnes<sup>2</sup> of CO<sub>2</sub> emissions every year,

One of COGEN Europe's multiple objectives is to create opportunities at the national and local levels for the sector to grow via the development at European level of a favourable environment (supportive energy policies, enabling research development deployment and innovation framework, allowance of funding opportunities for developers and operators, etc.).

COGEN Europe o The European Association for the Promotion of Cogeneration Rue d'Arlon 80, 1040 Brussels, Belgium T +32 (0)2 772 82 90 | F +32 (0)2 772 50 44 | info@cogeneurope o CHP is future proof and fuel flexible, having the capability to easily switch to renewable sources including biomethane, bio-LPG, hydrogen. ...

COGEN Europe has built up an extensive network of partners in Brussels and beyond, including numerous European associations with whom we share information and develop joint activities. Through all the initiatives that we support, we pursue the promotion of an efficient, resilient, decentralised and decarbonised European energy system. ...

COGEN Europe actively participates in EU policy making with a special focus on energy, climate and environmental matters. We share our policy positions with policymakers, stakeholders and the wider public via our position papers and publications. Our papers reflect the consensus view of our members spanning the entire energy supply chain.

COGEN EUROPE These guidelines aim to assist COGEN EUROPE and association members in identifying the situations in which it may wish to take action against anti-competitive behaviour by its members and reduce the risk of infringing the competition rules. Please read them carefully. Disclaimer: The attached Guidelines do not constitute legal advice.

COGEN Europe's Annual Conference brings together companies and organisations with an interest in cogeneration technologies and applications. The Conference programme includes a series of panel sessions looking forward to the challenges and opportunities that the cogeneration sector will face during the next five years, under the incoming European Commission which is ...
