When comparing the Powerwall to the top 9 alternatives, it becomes clear that the Powerwall brings a lot to the table. Between the amount of battery capacity you get for the money, the power output capabilities, the sleek aesthetics, and the 24/7 power monitoring via the smartphone app, the Powerwall is hard to beat.

That said, installing a Tesla Powerwall could cost between $12,000 and $16,000, so it may not be the most cost-effective battery for your solar system. And it might not even be the best in terms of performance. There are quite a few Tesla Powerwall alternatives that give this popular battery a run for its money.

While the Powerwall certainly wasn"t the first solar battery to hit the market, it was the most impressive when it did. The battery itself was sleek and modern, the capacity was a then-impressive 6.4 kilowatts (kW), and you could link up to 10 Powerwalls together. This was and still is technology that is missing from many competitors.

The Powerwall 2 is well ahead of the closest competition. Tesla Powerwall Across the World Most of the photovoltaic systems in Australia are small-scale residential, and increasingly, commercial ...

When assessing how the Powerwall shapes up against strong Powerwall competitors, several key aspects come into play. Capacity: The Powerwall 2 offers a substantial 13.5 kWh capacity, making it suitable for many residential applications. As the demand for sustainable and reliable home energy solutions grows, the market for home backup systems has expanded beyond the well-known Tesla Powerwall. While the Powerwall has set a high standard, various alternatives offer unique features and advantages. This article delves into the best Tesla Powerwall alternatives, exploring their specifications, ...

The first Powerwall requires a Gateway ($1k, per Tesla), so they are charging you $6k or so in labor for the third Powerwall which is a lot, given that marginal labor to add a third power is minmal. Most of the work is in the first one. An additional $8-10k would have been reasonable in my book, but, and it is a big but, local markets are local.

Capacity and modularity Both Powerwall models are pretty similar in this category. They both store up to 13.5 kWh (usable), which is a common size among home batteries.
