

How can Cuba build a more resilient energy system?

Building a Cleaner, More Resilient Energy System in Cuba recommends numerous ways by which domestic policy in Cuba can prioritize working towards a more sustainable, resilient grid -- especially by investing in the energy transition-- and ways in which international cooperation can support these goals.

How does Cuba rely on oil?

Cuba is dependent on fossil fuels for energy generation and relies on oil imports of crude and fuel oil from Venezuela and Russia, as well as floating power plants provided through an agreement with a Turkish business group.

Is Cuba's energy infrastructure in a precarious state of aging and disrepair?

The report highlights the issue that not only is Cuba's energy infrastructure in a precarious state of aging and disrepair, but also that its entire energy system relies heavily on external aid and imported fossil fuels.
