

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

What are the main sources of energy in Djibouti?

Traditional biomass fuels, petroleum products and electricity have a significant share in the country's energy mix. AFREC 2020 energy balance shows that the total primary energy supply in 2018 was 457ktoe. Djibouti has no indigenous sources of oil, natural gas, hydropower or coal.

How does Djibouti produce electricity?

This is mostly supplied by thermal power plants that utilise oil and diesel as fuel. The two primary plants in Djibouti City have a combined generation capacity of roughly 122 MW, with two smaller plants located in Obock and Tadjoura.

How is Djibouti reducing its dependence on imported power?

Djibouti is also working to reduce its dependence on imported power by investing in domestic production and diversifying its energy mix. The government has ambitious plans to become the first country in Africa to fulfil 100% of its electricity demand from clean energy sources while also extending the power grid to reach 100% of the population.

Can Djibouti produce geothermal energy from urban waste?

To this end, US-based CR Energy Concepts, in collaboration with the Ministry of Energy and Natural Resources, launched a project in 2019 to produce 35 MWh of baseload electricity from urban waste. Exploration of Djibouti's geothermal potential began in the 1970s, but progress in subsequent decades was slow.

Does Djibouti have solar energy?

Djibouti has significant solar energy potential, with an estimated average daily global horizontal irradiance of 4.5 to 7.3 KWh per sq metre across its territory. The construction of the first large-scale solar generation project began in November 2022 in the Gran Bara Desert, which is located in the country's southern region.

Egypt-Djibouti Solar Power Plant Agreement. The agreement, signed via video conference, paves the way for the installation of a 276.5 kilowatt solar power plant in Djibouti. This initiative reflects the increasing focus on renewable energy development and aligns with Egypt's expertise in this field.
