

Dominican Republic power bank for home

What type of power socket is used in the Dominican Republic?

The power sockets in the Dominican Republic are of type A and B. The standard voltage is 110 V at a frequency of 60 Hz. Check your need for a power plug (travel) adapter in the Dominican Republic.

Does the Dominican Republic need a power adapter?

Most electronic devices from North America and other countries using the same voltage and plug types will work in the Dominican Republic without needing any adapters. If you are bringing electronic devices that use different plug types or require a different voltage, you will need to purchase a travel adapter or voltage converter.

What type of power plugs are used in the Dominican Republic?

In the Dominican Republic, power plugs and sockets (outlets) of type A and type B are used. The standard voltage is 110 V at a frequency of 60 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

What is the standard voltage in the Dominican Republic?

The standard voltage in the Dominican Republic is 110 V and the standard frequency is 60 Hz. What kind of power adapter do I need for the Dominican Republic? Since US plugs are compatible with type A and type B outlets, American travelers shouldn't need an adapter or converter in order to charge their electronic devices in the Dominican Republic.

Do I need a voltage converter in the Dominican Republic?

The Dominican Republic uses 110 volts, the same as the United States. You will not need a voltage converter. However, the Dominican Republic uses different plug types, so you will need a travel adapter to plug your devices into the outlets.

Do device plugs work in Dominican Republic?

Most device plugs will work with the outlet types in Dominican Republic. Also, the voltage in Dominican Republic is the same as in the United States and Canada. Please note: an adapter will be needed if your device plug has a grounding pin and you are trying to use a Type A outlet.
