What is the Global Solar Atlas?

The primary aim of this Global Solar Atlas is to provide quick and easy access to solar resource and photovoltaic power potential data globally, at a click of a mouse. GIS layers and poster maps showing global, regional, and country resource potential can be found in the Download section.

What is solar resource information in the Global Solar Atlas?

Solar resource information presented in the Global Solar Atlas offers an excellent opportunity to do site prospection and pre-evaluation of the potential of solar energy in different countries and areas. Here is a guide on how to use it Access control: Open Licence: Creative Commons Attribution

What raster data is used to calculate photovoltaic power potential (pvout)?

The primary input is a global raster data layer, representing the long-term average of photovoltaic power potential (PVOUT), calculated by the Solargis approach. We consider a typical large-scale PV power plant.

What is a photovoltaic power output histogram?

Distribution of a photovoltaic power output histogram communicates how much land in the country is available in practical potential Levels 0, 1, and 2, and various PVOUT ranges. It helps to understand what might be the approximate area for PV development available in the best or moderate parts of the country.

How do we assess the costs of PV power generation?

We assess the costs of PV power generation at the country level based on the practical potential and the concept of LCOE. By using geospatial analysis of key factors, we identified the theoretical, practical, and economic potential of PV in each country in the form of maps and summary tables. Theoretical physical potential

What is building-integrated PV evaluation?

Building-integrated PV evaluation presents a highly computational and data-intensive task and is out of the scope of this report. The second strand of research focuses on the assessment and selection of sites for utility-scale, ground-mounted solar power plants, and is therefore more relevant to this study.
