

How does ExaGrid work?

ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. The system scales as needed by adding ExaGrid appliances, which virtualize into a single scale-out system automatically, adding capacity and processing power while acting and being managed as one unified system.

How long does ExaGrid last?

gether, or "rehydrated," which can take hours to days. In addition, unlike other appliances that "end-of-life" in as little as 18 months and are incompatible with newer models from the same vendor, ExaGrid's scale-out architecture allows you to "mix and match" different capacities and generations of appliances within a single system. Only

Is ExaGrid a trademark?

ExaGrid reserves the right to change specifications or other product information without notice. ExaGrid and the ExaGrid logo are trademarks of ExaGrid Systems, Inc. All other trademarks are the property of their respective holders. ©2022 ExaGrid Systems, Inc. All rights reserved.

Can ExaGrid appliances be mixed and matched?

ExaGrid appliance models can be mixed and matched, from 1-32 appliances, in a single scale-out system. ExaGrid's appliances work seamlessly with the industry's leading backup applications and typically install in about one hour.

How do I contact ExaGrid?
