

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

Does Moldova have a natural gas monopoly?

Moldova made progress toward unbundling Moldovagaz, the vertically integrated natural gas monopoly, to comply with Third Energy Package requirements. Romania's Transgaz completed the Ungheni-Chisinau Pipeline in 2021 and took over the operation of the entire gas transmission network in September 2023.

Does Moldova have a power system?

Although Moldova is interconnected with Romania, the two systems do not operate in parallel but can function together in island mode (four islands can be created). Romania's power system is part of ENTSO-E, and Moldova is currently working towards full synchronisation.

While today's final energy mix in the Republic of Moldova still heavily depends on fossil fuels and biomass, more ambitious climate mitigation policies are expected to lead to greater energy savings and a shift to lower carbon technology options. To reach net-zero, deep electrification across the sectors is needed resulting in greater share ...

In 2022 the U.S. Agency for International Development (USAID) selected Tetra Tech to implement the four-year, \$60 million Moldova Energy Security Activity (MESA). MESA builds on Tetra Tech's decades of experience strengthening energy security in Europe and Eurasia, and focuses on providing policy, infrastructure, and science-based solutions to help Moldova power homes ...

Moldova imports most of its energy from abroad, with Russia traditionally acting as a key supplier of both oil and gas. Until 2022, Moldova received nearly all of its gas from Russia. On top of this, more than 70 per cent of Moldova's electricity supply comes from the Cuciurgan thermal power plant in Transnistria, which runs on Russian gas.

Moldova Renewable in % Electricity Production. The objective goal set in the Moldovan Energy Strategy 2030 to increase the share of renewables in the final energy consumption to 17% in 2020 was overreached (25% in 2020), mainly because of heating (share of 41%), as the share for electricity was only 3% and that for transport 0.2%.
