

Does Venezuela have a solar panel factory?

The engineer says: "It's incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn't have any staff. There's materials in the storage facilities to produce for three years and supply the entire country with alternative systems.

What happened to fundaelec in Venezuela?

The use of solar power in Venezuela proved to be a sustainable, eco-friendly, and cheaper alternative than putting up cable installations. Then the country prepared for more, but FUNDAELEC was declining: it was no longer part of PDVSA and it became part of CORPOELEC, the state institution for electric power.

What is a hybrid energy system in Venezuela?

In 2005, hybrid systems that mixed energy from the national electric grid with solar energy, eolic energy, and diesel fuel backup started being installed in Venezuela, with the Sembrando Luz program from the Foundation for Development of the Electric Service (Fundación para el Desarrollo del Servicio Eléctrico, FUNDAELEC).

Is a section of Venezuela's electrical system out of service?

A new threat is looming now: a section of one of the three 765 kv main lines in the Venezuelan electrical system is out of service, said engineer José Aguilar on October, 4th. The electric transmission for the entire country is limited to roughly 2,000 mw, the equivalent amount of electricity used in Caracas.

How many power outages does Venezuela have a month?

The Venezuelan capital goes through at least 20 power outages per month, ranging from eight to 60 hours long. In this crisis, as Ponte explains, it doesn't make sense to install electric backup systems when there's no electricity to feed them.

Why did Venezuela start a hybrid electric system?

The promise: Venezuela was to have the most modern, clean and profitable electric network in Latin America. The idea was another hybrid system and its resulting energy would be capable of boosting the National Electrical System, relieving the load of Guri dam at a cost that could be covered even with an oil price of \$15 per barrel.
