

I am a highly motivated postgraduate mechanical engineer with a strive for... · Experience: PowerUP Energy Technologies · Education: Bauhaus University Weimar · Location: Tallinn, Harjumaa, Estonia · 226 connections on LinkedIn. View Nikolai Maklakov's profile on LinkedIn, a professional community of 1 billion members.

Up Catalyst OÜ (a partner company of PowerUp Fuel Cells) is producing carbon nanomaterials (graphite, graphene, nanotubes etc.) and is offering a full-time position for a laboratory intern. Students...

PowerUP Energy Technologies | 5,287 followers on LinkedIn. Innovative hydrogen fuel cell based back-up generators | PowerUp provides clean and portable energy by delivering a hydrogen fuel cell backup generator solution, which can be used for various technologies - yachts, boats, recreational vehicles and many more.

Energy comes in multiple forms - mechanical, electrical, thermal, and chemical - so the means and technologies of converting and storing energy vary greatly, yet are plentiful. Figure 3: Large-scale energy storage systems . Energy storage systems have emerged as key enablers for a wide deployment of renewable energy sources.

We develop and produce high-quality and sustainable energy generation products and custom energy solutions. With more than 15 years of experience with fuel cell technology, PowerUP is an innovator in the fuel cell technology market. We ...

Seller is PowerUp Fuel Cells OÜ, a company registered in the Republic of Estonia, under registry code 14110442 (Seller, we, us or our). Our contact information is as follows: PowerUp Fuel Cells OÜ Akadeemia tee 23, Tallinn 12618, Estonia e-mail: info@powerup-tech phone: +372 5036963 Website (Website) 1.3.

The aim of this project is to develop new and innovative bipolar plates (BPP) and membrane electrode assembly (MEA) for PowerUP's air cooled fuel cell stack. Project is in a partnership with a France company HYCCO who will develop novel and ultra-thin carbon fiber based BPPs.

With an aim to obliterate these hurdles to seamless electricity generation and storage, Tallinn-based PowerUP Energy Technologies is offering an exceptional line of silent, odorless, and lightweight hydrogen fuel cell smart electric generators that are far more efficient and sustainable than their traditional counterparts.

Mark Jardine, Managing Editor of Sail-World , talks to Dr. Ivar Kruusenberg, CEO and founder of PowerUP Energy Technologies, at METSTRADE 2021 to find out more about their fuel cell generators which use pure

hydrogen gas as fuel, work silently, generating electricity and producing water as the only by-product.

The purpose of the project is to develop and assemble in co-operation with Beyonder AS and Nordic Batteries AS a 10,000 W proton exchange membrane (PEM) fuel cell based portable generator, UP10K Pro, which will provide clean energy to a number of industries that require uninterrupted power supply, but is mainly targeted to the construction and mining industry.

"PowerUP Energy Technologies instead, is implementing the clean solution described across its whole product range exactly to cover a wide variety of use cases. The just-launched UP400 is just the beginning, as it testifies the high volume of orders the company has already received," Kruusenberg says. Smaller (200W) and larger (1000W ...

We screen new energy technologies with world-changing potential, including: The Energy Transition. Our work points to an economic decarbonization of the entire energy industry by 2050, with a CO2 price that averages \$40/ton.. The Ascent of Renewables will deliver an enormous 30,000 TWH of energy by 2050, but this also requires overcoming vast bottlenecks, in metals, ...

Up Catalyst (a partner company of PowerUp Fuel Cells) is producing carbon nanomaterials (graphite, graphene, nanotubes etc.) and is offering a part-time or full-time position for a market...

The French Southern and Antarctic Lands are an overseas territory of France that consist of the following: Adelieland (Terre Adelieland): This is the French claim on the continent of Antarctica.; Crozet Islands (les Crozet): A group of islands in the southern Indian Ocean, located south of Madagascar.; Kerguelen Islands (Archipel des Kerguelen): A volcanic island group in the ...

PowerUP Energy Technologies | 5,653 followers on LinkedIn. Innovative hydrogen fuel cell based back-up generators | PowerUP provides clean and portable energy by delivering a hydrogen fuel cell backup generator solution that can be used for various industries- including construction, telecommunications, security & defence, healthcare and many more.

French Southern Territories, comprising of several islands in the Indian Ocean, are isolated with a harsh climate, making technology and telecommunications development challenging. The territories have no indigenous population, with only temporary French military personnel, scientists, officials and support staff residing. The main regions include Kerguelen Islands, St. ...
