The signing of the contract, by Serbia's Minister of Mining and Energy Dubravka Dedovic Handanovic, alongside representatives of state-owned power utility company Elektroprivreda Srbije (EPS ...

In this dynamic environment, CHINT Global has been committed to providing electrical equipment for Serbia's national power system, contributing to a sustainable future for the country. Delivered Serbia's Largest Single-Capacity Solar Project. In July 2023, CHINT Global won the bid for Power China's Saraorci 13.86MWp PVPP Project in Serbia.

It will generate sufficient clean energy to power more than 31,000 households annually and prevent the release of 426,000t of CO<sub>2</sub>e [carbon dioxide equivalents] each year. The acquisition, to be finalised by the end of 2024, is part of Alcazar Energy Partners' aim to build a \$600m renewable energy asset base in Serbia.

In the solar power auction, only 11.6 MW was awarded out of 50 MW available. The lowest accepted bid for solar power came in much higher than for wind power. Both competitive bidding processes were the first of their kind in Serbia. The winners have the right to sign 15-year contracts for difference (CfDs) at the accepted price.

The project consists of two components: solar power plants and battery systems for electricity storage. Solar power plants will have a total installed power of 1,000 MWac (or 1,200 MWdc), and to ensure the greatest uniformity of electricity production, the total installed power must be distributed among five or more independent solar power plants.

Considering the popularity of national history and reading in Serbian society and the consonance between

Russian and Serbian narratives in the aforementioned themes, they have come together as a solid cultural foundation for the Kremlin's soft power in Serbia. The cultural aspect of Russia's soft power in Serbia also has a solid material base.

Power struggle: Serbia eyes nuclear energy to fuel future Belgrade, Sept 11 (AFP) Sep 11, 2024 Time stands still at Serbia's Vinca nuclear facility, where the decommissioned Yugoslav-era reactor is a testament to the fears generated by the controversial energy source.

Alcazar Energy Partners, a key player in the renewable energy market, has made a substantial commitment to Serbia's energy transformation, investing around \$600 million in a series of renewable energy projects. This ambitious investment is centered around the development, construction, and operation of wind and solar energy projects, with the goal of ...
