

What is a Generac pwrcell 2?

The Generac PWRcell 2 is a home energy storage system that can provide whole or partial home backup power. This is the second generation of Generac's popular home battery solution, and the new version offers extra power output and new home integrations.

How much does a Generac pwrcell battery cost?

A Generac PWRcell 2 series battery system costs between \$14,000 and \$25,000 without solar panels, depending on the size of the battery (9 to 18 kWh) and your location. Another PWRcell cabinet with an additional 18 kWh of storage can be added to the system for about \$15,000.

Should I buy a Generac pwrcell?

Compared to other leading home energy storage systems, the Generac PWRcell is a bit more expensive but offers some unique functionality, like controlling your home's HVAC system to extend battery life. SolarReviews recommends the PWRcell for people who have or want a Generac standby generator in addition to the battery.

Does Generac SDS work with pwrcell 2?

The Generac SDS can automatically activate the gas generator to charge the battery when it gets low. The PWRcell 2 is an integrated home energy backup system, which means it must be installed with all the main components (battery cabinet, inverter, and smart disconnect switch) to work.

Is the Generac pwrcell compatible with the energy management app?

The Generac Pwrcell is compatible with Generac's well-rated energy management app - PWRview. The PWRview app monitors your solar production, shows your battery's state of charge and tells you when you're drawing power from the grid and when you're feeding power to the grid.

Can I use a Generac home backup generator with pwrcell?

Using a Generac home backup generator with the PWRcell system allows you to power your home during long power outages, even with little or no solar power. The Generac SDS can automatically activate the gas generator to charge the battery when it gets low.

PWRcell system modes Generac PWRcell offers several system modes for various installation configurations, markets, and applications. Connected REbus devices work together to manage the distribution of power based on the selected system mode. Some modes interact with PWRcell batteries to store power and/or balance production and consumption.

WAUKESHA, Wis., Sept. 10, 2024 /PRNewswire/ -- Generac Holdings (NYSE: GNRC), a leading global designer, manufacturer and provider of energy technology solutions and other power products, today
