

Could a community solar program benefit Georgia Power customers?

Several solar industry insiders made a pitch to a Georgia House committee on Wednesday for the economic and environmental benefits of establishing a community solar program that allows Georgia Power customers to purchase electricity from small-scale solar developers.

Does Georgia have solar power?

Georgia Power has resisted expansion of solar power use in the state in recent years. Steve Butler, spokesman for the Georgia Solar Energy Industries Association, credited the Georgia PSC for its continued support of solar development since more than a decade ago, when the Commission approved a 50-megawatt solar project.

Should Georgia add community solar?

"Georgia can greatly benefit from adding community solar during an energy crisis or a time of need, and even if that crisis has ended, with the largest airport in the world and the fourth largest port, it's doubtful that we're going to need less energy anytime soon," Butler said during the committee meeting held at Kennesaw State University.

HOUSTON COUNTY, Ga. -- A large-scale solar farm may come to Houston County, but for one naturalist, the proposed location is too close to home. John Trussell is a certified master naturalist, is on the Houston County Zoning and Appeals board and has been a 35-year nature writer for Georgia Outdoor News.

Original date the project was improved was around 8/12/2022. It took months for them to finally install the solar equipment which came in 1/2023 The first inspection by the county was in February.
