

Who is Outback power?

OutBack Power designs and manufactures off grid and grid connected solar plus storage systems for energy independence. Whether you need a solar inverter, solar battery, or other renewable energy product, OutBack is the choice for your system.

Can Georgia Power restore power after a storm?

Once the storm passes and conditions are safe, Georgia Power is committed to working safely and as quickly as possible to restore power to customers. Even if you do not see crews in the field, rest assured restoration workers are focused on getting the lights back on for customers.

Is Georgia Power prepared for severe weather?

Just as Georgia Power is prepared for severe weather, the company wants customers to be prepared too. High winds and heavy precipitation from storms can cause destruction in the community, including damage to the energy grid causing power outages.

Is Georgia Power owned by Southern Company?

Georgia Power is the largest subsidiary of Southern Company, one of the nation's largest generators of electricity. The company is an investor-owned, tax-paying utility, serving 2.3 million customers in 155 of 159 counties in Georgia. Georgia Power's rates remain well below the national average.

How do I schedule a reconnection of my Georgia Power service?

If you decide to schedule your own contractor, please call 1-877-749-3931 when repairs are complete so that your home can be added to the service restoration schedule. Once your damaged service is repaired and Georgia Power is notified, we will schedule the reconnection of your service. What causes an outage? Storm FAQ: What causes an outage?

Dear Kurt, You are absolutely correct. Yesterday we figured-it-out, 2-wired 230V 50Hz, just L1 230V and N legs. When I purchased this inverter last July, got some advice from your rep. in India, and he told me 8045 would work as is 120 and 240 AC input...

Good day everyone. I have had my Outback since 2008 and it's still going strong. :D/ I am currently upgrading the solar array. What I need to find out is what will be a good (best) configuration to connect 12 x 100w solar panels to the Outback and what is best settings for charging LiFePO4?

Die Garantielaufzeit beginnt mit dem ersten Eintreten eines der Informations relatives au recyclage est n&#233;cessaire pour renvoyer un produit, OutBack en envoie une sur IMPORTANT : Recyclez les composants &#233;lectroniques et les batteries Les batteries sont consid&#233;r&#233;es comme des d&#233;chets

For more information, please visit ABOUT ENERSYS®; EnerSys, the global leader in stored energy solutions for industrial applications, manufactures and distributes reserve power and motive power batteries, battery chargers, power equipment, battery accessories and outdoor equipment enclosure solutions to customers worldwide.

Hello there, I am in the process of setting up an off-grid solar power system for a cabin located in a remote area. I have chosen to use OutBack Power products based on their reputation for ...

Single-phase 120V or 230V sinewave output in 12V, 24V, or 48V versions; Programmable for seven different modes with generator assist; Modular, stackable design for up to 9 inverters in three-phase and 10 inverters in grid-tied

Matt, I have wondered as well if the Radian's built in magnetics act like the balancing transformer which would allow an unbalanced load. By the overload specs 100A at 240V and 200A at 120V, that would seem to be the case, but it isn't clear if the magnetics would overheat if you applied a continuous 4500W or say 5000W 120V load on the inverter.
