

Who is Freyr battery?

FREYR Battery is a developer of clean, next-generation battery technology production capacity. The Company's mission is to accelerate the decarbonization of global energy and transportation systems by producing clean, cost-competitive batteries.

Where is Freyr based?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in the United States and Vaasa, Finland. FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030.

Does Freyr battery have a Giga America plant?

Freyr Battery has begun construction of its "Giga Arctic" factory in Norway, which is the template for its planned "Giga America" plant in Georgia. European lithium-ion battery upstart Freyr Battery is deepening its transatlantic ties, lured to the US by lucrative incentives that have unleashed a clean energy manufacturing renaissance.

How much battery capacity does Freyr plan to install in 2025?

FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030. To learn more about FREYR, please visit [Cautionary Statement Concerning Forward-Looking Statements](#)

When will Freyr charge its first battery unit cells?

FREYR has assembled and successfully charged its first battery unit cells at the company's Customer Qualification Plant ("CQP") and is on schedule to ramp process automation, production, and testing of chargeable cells in H2 2023 and beyond.

When will Freyr buy Trina Solar?

FREYR will acquire Trina Solar's 5 GW solar module manufacturing facility in Wilmer, Texas, which started production on November 1, 2024. The facility is expected to ramp up to full production in 2025 with production volumes backed by firm offtake contracts with U.S. customers. The transaction is expected to close year end 2024.
