La nuova generazione delle nostre batterie, basata su una tecnologia ibrida idrogeno/liquido, è frutto dell'incontro tra R& D, ingegneria e product design, teso a superare lo stato dell'arte dei sistemi di accumulo già esistenti. Basata su brevetti proprietari, la batteria a idrogeno è una piattaforma tecnologica che consente di sfruttare un'architettura ibrida gas/liquido per ampliare ...

Since 2015, we built a unique and effective know-how in the development of fully green innovative stationary storage systems. Today, thanks to our research method and technology platform based on proprietary knowledge, we are acknowledged among the key players of Energy Storage, and we will strengthen our positioning through the IPCEI for the European Battery Innovation ...

If industrial heat goes green, so does the planet. 01 August 2024. If heat goes "green," so does the planet. The ecological transition relies on the decarbonization of industrial processes, and a substantial portion of industrial energy consumption is dedicated to heat production. Heat accounts for about half of the global energy demand.
