The battery lasted longer, battery health worked and capacity was correctly reported in 3utools. They released a newer "Max v2" version since then with 3650mah for the 6s+. Don't go for a higher capacity battery. The best batteries are the official ones that Apple uses, so you're looking for a genuine OEM battery. If you go for a larger capacity battery, it won't be much larger capacity since it can't be physically any bigger or it won't fit, and third party batteries are usually produced very cheaply and don't last.
