

Are solar panels a scam?

That is, of course, also a scam. To protect yourself from clean energy scams: Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more.

What are energy scams?

Energy scams involve people pretending to be energy companies or regulators to get your money or personal information. These scammers may pretend to be your energy company, say they're from Ofgem or even from Energy Saving Trust to try and gain your trust.

How do I avoid solar scams?

Here are some of our recommendations for avoiding solar scams: The saying "there's no such thing as a free lunch" applies when shopping for solar! If you see ads on social media or have a door-to-door salesperson stop by your home and share special programs that pay you to go solar, they're likely, not legitimate.

Can a scammer sell your energy?

This is where a scammer claims to be from the energy regulator Ofgem. They may ask you to change your bank details or provide personal information to get funding or cheap energy. Ofgem will never ask you for personal information. They will also never sell you energy or show up at your house.

What if my company offers solar energy?

If your company offers solar energy, remember that claims must not only be truthful, but also comply with established consumer protection laws, including the FTC Act and the FTC's new Impersonation Rule. Be truthful. Every clean energy company has a responsibility to be honest and upfront with consumers. Be transparent about what you're offering.

What should I do if a solar business is a scam?

Protect your personal information. Don't respond to unexpected requests online or on social media for your name, address, or other personal information to "see if you qualify." At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammers trying to steal your identity.

See It Why it made the cut: This certified, affordable, small home wind turbine should suit your needs well. Specs. Swept area: 1.07 square meters Height: Adjustable as needed Certification: IEC ...
