What causes damage to solar panels?

Here, we break down the most common causes of damage as well as the steps you can take to extend your solar panels' lifespan. Even the smallest debris, like twigs, leaves, or dirt, can cause small micro-scratches on your solar panels. The scratches from fallen debris can dramatically lower your panels' energy output.

Should you remove or uninstall solar panels?

Removing solar panels properly ensures safety, prevents damage, and makes future solar projects easier. Uninstalling solar panels involves a meticulous process divided into six essential steps. From inspecting and preparing to the final decision of reinstallation or disposal, each phase demands attention to detail.

What should I do if my solar panels are damaged?

Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels. Doing so may mean pruning trees and bushes or removing them if they become too large. Regularly clean your panels or have a professional service perform the task. Have regular professional whole-system inspections.

How do I protect my solar panels from water damage?

To best avoid water damage, take the time to reseal each panel or have a licensed solar panel contractor do this for you. Upon inspection, an expert will also be able to gauge if anything else can be done to maintain your solar panels.

Are photovoltaic solar panels sustainable?

Nevertheless, not all that looks sustainable stays that way upon the end of its life cycle. At least, that is the most common worry regarding photovoltaic (PV) solar panels. They are a sustainable energy source, dependent only on solar radiation, and capable of delivering electricity to our homes.

Can a waterless cleaning method remove dust from solar panels?

Dust that accumulates on solar panels is a major problem, but washing the panels uses huge amounts of water. Engineers have now developed a waterless cleaning method to remove dust on solar installations in water-limited regions, improving overall efficiency.
