

# How to fix photovoltaic panels with pressure blocks

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

How do I install a solar photovoltaic system?

The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year. The possibilities for mounting solar are endless.

Can solar panels be mechanically fixed to a flat roof?

When you specify a photovoltaic array for your flat roof, there is the option of either mechanically fixing the array, or alternatively using ballast to weigh it down without fixing into the structure. In this article we will look at the options for mechanically fixing solar panels to a flat roof and make the case for an engineered solution.

Do you need Scaffolding for solar panels?

Unless your building is single storey, you'll need to have scaffolding put up. The fixing system used to hold solar PV panels on your roof must be strong enough to support the weight of the panels in all weather conditions, including strong wind.

Can you make a whole roof out of solar panels?

It is possible to create a whole roof out of solar panels using an in-roof system. Making the whole roof out of solar panels can be a fantastic option as installing solar panels is an asset to the home because of the savings in electricity and feed-in tariff payments. Why not consider making it your total roof covering?
