

How to get the electricity fee refunded by photovoltaic panels

Does fit pay for solar panels?

The FIT scheme still pays many solar panel owners for the electricity they generate at home, but it is closed to new applicants. All large energy suppliers - with more than 150,000 domestic electricity customers - must participate in the SEG. Smaller suppliers can choose to offer solar export tariffs too.

How do free solar panel schemes work?

'Free' solar panel schemes, also known as rent-a-roof schemes, used to be commonplace a few years ago. These were run by companies eager to cash in on the feed-in tariff (FIT). This guarantees payment in return for electricity generated using renewable technologies, including solar power.

Will new solar homes get a payment from suppliers?

New solar homes and businesses creating and exporting electricity to the grid will be guaranteed a payment from suppliers under new laws to be introduced by the government this week (Monday 10 June).

How can I get paid for solar panels?

Additionally, Good Energy launched a new scheme in October 2024, which helps you get paid for the certificates (REGOs) produced when your solar panels generate electricity. Energy suppliers buy them to show that the electricity they sell is renewable.

How do tariff rates for solar PV installations work?

The amount of generation which is deemed to be exported is set by the Secretary of State for the Department of Energy Security and Net Zero each year in their annual determinations. Tariff rates for Solar PV installations are uniquely split into Higher, Middle and Lower bands.

When will solar panels pay back to the grid?

New rules introduced this week will give homes and businesses that install solar panels payments for exporting electricity back to the grid from 1 January 2020.
