

# How to install photovoltaic panels as an agent

Can I install solar panels myself?

While it's technically possible to install solar panels yourself if you have the necessary qualifications, we recommend you use our MCS-accredited installers who specialise in safe and professional solar panel installations. Solar installations must be: Completed by a registered and certified electrician.

How do I plan a solar panel installation?

Choose a supplier and establish if the installation will fall under Permitted Development or if full planning permission is required 3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5.

What does a solar panel installer do?

As the name suggests, the main focus of a solar panel installer is to install solar panels, mainly on the roofs of homes and commercial buildings. However, there is a little bit more to the role than this alone. For example, an entire solar panel installation project and follow-up checks will likely include all of the following:

How can I become a solar panel installer?

Alternatively, if you're only just qualifying to be a tradesperson, then you could choose to go with an apprenticeship to earn while you learn, or if you've been working as an electrician or roofer for a while, then you could see about finding a local training centre that offers an approved solar panel installation course.

Do I need an electrician to install solar panels?

While you don't need to be an electrician to install solar panels, such qualifications and experience can certainly be helpful. After all, one of the main aspects of solar panel installation involves joining your new panel installation to the mains electricity, which requires proper electrical knowledge to do safely.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.
