Do solar modules work with the Z-bracket mounting system?

Modules provided by other manufacturers may work with the Z-Bracket Mounting System provided the following conditions are met: Solar module weight does not exceed 88 lbs (40 kg) or total load per bracket does not exceed 22 lbs (10 kg). Solar module framing material is constructed of an aluminum

How do I mount a PV module to a substructure?

**MOUNTING INSTRUCTIONS** PV modules can be mounted to the substructure using either corrosion-proof M8 bolts placed through the mounting holes on the rear of the module or specially designed module clamps. A clearance of at least 115mm(4.5in) (recommended) is provided between module frame and the surface of the wall or roof.

What is the maximum voltage a photovoltaic module can run?

For roof use, the maximum system voltage must not exceed 600V according to National Electrical Code. Under normal conditions, a photovoltaic module is likely to experience conditions that produce more current and/or voltage than reported at standard test conditions.

Can a racking system be used to ground a PV module?

This racking system may be used to ground and/or mount a PV module complying with UL 1703 only when the specific module has been evaluated for grounding and/or mounting in compliance with the included instructions. The system is a non-separately derived system.

How do I connect a solar stack module to a pedestal?

Modules should be bonded to the Solar Stack pedestals with the manufacturer approved middle/end clamps. Grounding hardware (as a part of the module clamps) forms secure electrical bonds with both the module and the pedestal, resulting in many parallel grounding paths throughout the system.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.
