

What is the IDM energy management system?

The iDM energy management system visualizes and optimizes the operation of all networked energy-relevant components. The Navigator provides statistics on the entire system and energy balances with generated and consumed energy.

What makes IDM a leader in Intelligent Energy Management?

Our long-established family business is one of the technology leaders for intelligent energy management in our company, primarily due to its development expertise and numerous technical innovations. One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987.

Is IDM energy a good company?

A steady growth indicates that the management of the employees is the right one. After more than 45 years, the iDM energy family is proud of the company and their employees, who were and are the pillars of success. If playback doesn't begin shortly, try restarting your device.

Where is IDM based?

From the company's headquarters in Matrei in East Tyrol, customers all over Europe are supplied with high quality and reliability. Installers receive comprehensive planning support for the realization of new projects, and can also regularly acquire up-to-date know-how at events and seminars of the iDM Academy.

What is IdM system cooling?

With iDM system cooling, heating and cooling can be produced simultaneously. This almost doubles the efficiency of the system. Ideal for use with systems that also have a similarly high heating/hot water requirement in cooling mode.

Are IDM heat pumps sustainable?

iDM HEAT PUMPS provide sustainable heat that makes you independent! Heat pump systems from 2 - 1500 kW You are looking for - We have the solution! From a small family house to a hotel complex, we offer the perfect solution for your building. Single-family house Multi-family house Large object Which heat pump
