

Installing photovoltaic panels can make money

How much does it cost to install solar panels?

Solar panels are a long-term investment. It costs around £5,000 to £8,000 upfront to install a solar PV system that is expected to last 25 years. Keep reading to find out how long it will take before you can make a profit from solar panels, and to discover whether your home is one of those best suited to solar.

How much money can you make from solar panels?

Some people make up to £450 per year from their solar panels. Where solar panels were once very expensive, there were grants to help reduce costs. Now, solar panels are a lot cheaper but might not be a great source of profit.

Are solar panels a good investment?

Installing solar panels at your home or business premises can reduce your carbon footprint and earn you money. Not only do solar PV systems cut your energy bills, they can also actually bring in profit through the government's incentive schemes. We use smart data so you can compare energy prices in less than a minute.

Will installing solar panels increase the value of my home?

Estate agents' feedback suggests that installing solar panels will not increase the value of your home when you come to sell it.

How do solar panels save money?

Most of your profit from your solar panels will come from the savings you make. The amount you save will depend on your energy use. Your solar panels will generate power that you can use in your home. Any power you generate stops you from needing to pay another company for energy. If you generate a lot of energy, you could save hundreds of £s.

How do I finance a solar PV installation?

The most cost-effective way to finance the installation of solar PV panels is to pay in full using your own savings. If you're unable to pay upfront, you could consider a loan or remortgaging.
