

Is it good to install solar power in a house

Should you install solar panels at home?

Having solar panels installed at home sounds like an appealing idea. You get free electricity when the sun shines, potentially cutting your energy bills and doing your bit for the environment without having to give it much additional thought.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Are solar panels a good idea?

Installing solar panels is a great idea to increase your home's capacity for renewable energy, and possibly save money on your energy bills.

Do you need a solar panel system to be energy independent?

If you want to be fully energy independent, you will need more panels and a solar battery big enough to store the excess energy you generate. As long as you install a solar panel system powerful enough to cover your household's energy usage, you can rely on solar electricity for all your energy needs.

Should you add solar panel batteries to your solar system?

And, with the cost of solar panel batteries said to be gradually reducing, this is advantageous for homes that already have solar panels installed but that are thinking of adding batteries to their PV system to store excess energy.
