

Are 'free' solar panels a good idea?

Companies often offer "free" solar panels through leases or power purchase agreements (PPAs), where they install and maintain the panels at no upfront cost. "Free" solar panels can result in initial savings on your energy bills, but in the long run, the savings may not be as significant as owning your solar panels outright.

Does the government provide free solar panels?

The government does not provide free solar panels directly to individuals. However, various government incentives and programs can significantly reduce the expense of installing solar panels on your property.

Can you get free solar panels on a roof?

Companies offered to pay to lease your roof from you for 20-25 years and, in exchange, would install and maintain solar PV panels on it. You didn't have to pay upfront for the panels, and would also benefit from the free electricity produced by the system. But there are very few free solar panel schemes available now.

What is a free solar panel offer?

A "free solar panel" offer doesn't mean you will get solar panels for free. Instead, this usually refers to an agreement that allows you to start using solar panels without incurring upfront costs. However, you will have to make payments in the future.

Are "free" solar panels a scam?

However, it's important to note that "free" solar panels are not always a scam, but they do require careful consideration. These "free" solar panels are typically offered through solar panel leases or power purchase agreements (PPAs), which allow individuals to install solar panels without the high expense.

Where can I get free solar panels?

Some local cities and counties also offer direct rebates to help with the upfront costs of solar panel installations. If you're looking for free solar panels, or at least solar panels with less cost upfront, solar leases, solar loans, and community solar are good options.
