

Is Italy a good place to sell storage systems?

All studies which deal with the topic of storage systems consider Italy to be one of the most attractive locations for the sale and marketing of storage systems and the related innovative electricity supply models.

Why is the Italian storage system market so attractive?

The attractiveness of the Italian storage system market has increased also due to the consolidation of the regulatory framework, a process which began a few years ago and has now laid solid foundations for the development and offering of innovative business models and for making appropriate investments.

Why should you choose an automatic warehouse?

Our automatic warehouses effectively apply the vertical storage system and allow you to make the most of the organization of the space. The automated handling of materials and goods allows to speed up loading and unloading operations and to optimize times. An efficient warehouse guarantees quality service and offers operators a safe workplace.

What products can be stored in an automatic warehouse?

Conveyors, elevators and systems with ECS standard design complete and enhance our RGV installations. Characterized by "special" applications, the automatic warehouses are suitable to store a wide range of products, from car bodies to postal packages, from metals to pharmaceutical products.

What are automated vertical warehouses?

Ideal for tall structures, automated vertical warehouses are made of steel and are equipped with a motorised central elevator. Their main benefits of our automatic vertical storage systems include savings on space and keeping products neat and tidy.

What is a matter automatic warehouse?

It offers a wide range of flexible and customized solutions. Matter automatic warehouses can handle and store different materials such as bars, profiles, tubes, billets, sheets, dies and components. The modular automatic warehouses guarantee all the features and advantages of a large system, but in very few square meters.

Customized storage solutions. For the storage of bars, sheets, molds and heavy carpentry choose Ciampalini tailored solutions: special systems to satisfy every need. These are warehouses and solutions designed and developed to measure, made taking into account the specific needs of the end user. Contacts.

Modula Pallet: the automatic storage system for the safe, efficient, ergonomic storage of pallets. Pallets are among the most used means for handling goods in the warehouse. Thanks to its automatic technology, Modula Pallet makes it possible to handle 1200 x 800 mm Euro pallets - as well as other pallets or boxes with similar dimensions ...

The FRS system is a low bay storage solution used as production buffer before shipment as well as for high density storage. The FRS system, based on high speed linear shuttles combined with multi-depth satellite technology, makes it possible to achieve a very high throughput and storage capacity, in a small volume. The FRS system is characterised by a flexible block design ...

Modula's +35 years of experience and continual investment in technology has served customers well with leading automated storage solutions. This is evidenced by Modula's 20,000 clients worldwide and 25% growth year-over-year in the past five years. Made in the USA, Modula products are available from dealers across North America who are ...

We specialize in automated storage systems based on the goods-to-person principle. Remmert storage technology is characterized by high storage density, even for heavy and bulky goods, fast retrieval times and a high degree of integration. Perfect for the production-related storage of sheet metal, flat goods, long goods and workpieces for fast ...

Our History. Essegi Automation is born from the initiative of a passionate working group that realizes the need for SMT and THT electronic assembly companies to equip themselves with state-of-the-art equipment to reduce the inefficiencies created by the procurement process of components along the production lines.. This is how Essegi Automation was born from the ...

Characterized by "special" applications, the automatic warehouses are suitable to store a wide range of products, from car bodies to postal packages, from metals to pharmaceutical products.

AMOVA supplies automated high-bay storage systems for heavy loads of up to 50 tons in weight - coils, sheet stacks, slabs, long material as well as other heavy or bulky goods. Numerous references from all over the world testify to our decades of experience in this field. We hold the record for the world's largest high-bay store for steel ...

Automatic storage system with shifting trays for the storage of small to medium-sized items and a variety of odds and ends. Unlike more traditional automatic vertical storage systems, our storage system offers perfect adaptability to the ...

Automha Automha - Italy. In addition to its headquarters in Azzano San Paolo, in the province of Bergamo, Automha has 6 international sites, including one in China. ... Automha realised for the Treviso-based company a semi-automatic ...

ASRS Solutions Defined and Benefits. At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for ...
