

Are solar panels a good investment in Spain?

BARCELONA - Installing solar panels on your home in Spain can be expensive. However, you can significantly reduce that large investment by using subsidy schemes the Spanish government has introduced to stimulate the self-consumption of clean energy. Solar energy in Spain has reached more than 12,400 MW of installed capacity in 2022.

When do solar panel subsidies end in Spain?

Solar panel subsidies ended on 31st December 2023. But don't leave this page yet. There are still three important things to know: You might be disappointed to read that solar panel grants in Spain (sometimes amounting to over EUR3,000 for regular-sized solar panel installations) are not set in stone in 2024. But here's the thing.

How much does a solar system cost in Spain?

Subsidies based on these funds can be applied for until 31 December 2023. Depending on the type of installation and the power of the system, these are the established amounts for a single-family home in Spain: Subsidies of EUR600 per kWp for installations with a capacity of less than 10 kWp (most common) and EUR490 on the battery.

Are solar panels still being paid out in Spain in 2024?

This question confused many people about the grants for solar panels in Spain. The EU-funded solar grants are still being paid out in 2024 even though the deadline to apply for them was 31st December 2023. As we said above, people have actually received this subsidy already.

Are solar panels tax deductible in Spain?

Another interesting subsidy that stimulates the use of solar energy for self-consumption in Spain is the income tax deduction. Each year, a multitude of drafts can be deducted from your taxable income. However, many people do not know that the costs of installing solar panels can also form a deduction.

Who can apply for a solar pump under PM Kusum Yojana?

Under the PM KUSUM Yojana, farmers, farmer groups, panchayats, and cooperative societies are eligible to apply for a solar pump. This program's overall cost is divided into three components, each of which the government will help farmers with.
