

Why should you choose a solar panel system in Estonia?

A solar panel system will save you money on energy, and can also be used as a backup power source during power outages. The Estonian climate is favorable for solar energy production. The country experiences approximately 1600 hours of sunshine a year and the climate is relatively cool.

Can solar panels be installed on a flat roof in Estonia?

In Estonia, most solar panel installations are installed on pitched roofs. Ideally, the panels should be installed at a 41 degree angle on the south side of the building. If they are installed to the north, the panels will not generate electricity. Alternatively, flat roofs may also be installed with solar panels.

Who is the company Mysolar?

The main activity of the company is the sale and installation of solar panels. Company MySolar has been offering solar systems and project work for homeowners all over Estonia since 2015. The company is the sole representative of Italian and German panel brands in Estonia.
