

What is Kosovo's Energy Strategy?

The energy strategy foresees 170 MW in battery operating power. In addition, procedures are scheduled to be announced in the fourth quarter for a solar power plant of 100 MW for government-controlled power utility Kosovo Energy Corp. (KEK) and a solar thermal system for district heating in Prishtina, according to Rizvanolli.

What is the energy mix in Kosovo?

The other generation capacities in Kosovo come from hydropower plants while renewables are less represented in the energy mix although their representation has been rising in the last decade. Currently, Kosovo has 137 MW installed wind capacity and 10 MW installed solar capacities.

How secure is electricity supply in Kosovo?

Security of electricity supply depends on a fleet of aged coal-fired power plants built between the 1960s and 1980s owned and operated by the Kosovo Energy Corporation, one of the biggest public enterprises in the country. The uptake of renewables has been slow with a limited number of support measures in the last decade.

Is electricity a profitable business in Kosovo?

Electricity generation represents its main business, while its dominance in the sector has made it one of the most profitable state-owned enterprises in Kosovo. Kosovo initially planned to develop new generation capacities, competitively contracting a private company to build and operate a lignite-fired power plant.

Why is Kosovo at an early stage of energy transition?

The fact that Kosovo is at an early stage of its energy transition means that it is still possible to ensure that the main policies and interventions can be just and equitable to all groups.

Does Kosovo rely on coal?

Kosovo is a net importer of electricity whose majority of national generation capacities rely on coal. Despite its small geographical size, the third largest coal reserves known in Europe are situated in the country.

Quality education with competitiveness in the EU market; Effective health and services; Euro-Atlantic integration, membership in the UN and NATO; Modern army according to the NATO model ... Energy Strategy of the Republic of Kosovo 2022-2031. March 13, 2023 Energy-Strategy-of-the-Republic-of-Kosovo-2022-2031. Last modified: March 13, 2023 ...

This was said at the launch of the "Energy for Equality" project by MCC/MCA in Kosovo, an activity aimed at empowering women in the energy sector. The Minister of Economy, Artane Rizvanolli, has said that the expectations were that only 9 percent of the workforce in the energy sector in Kosovo would be

women and now it will be up to 25 percent.

Kosovo is a relatively new state, gaining independence in 2008. A Stabilisation and Association Agreement (SAA) between the European Union (EU) and Kosovo came into force on 1 April 2016. The SAA will support the implementation of reforms and move Kosovo closer to the EU.

EU policy framework: Energy Efficiency and buildings EU energy efficiency policy has gained momentum in the past years. Also globally, it has been recognized as critical in accelerating the energy transition, as well as enhancing energy security and ...

The EUR 75 million is the first tranche of money Kosovo will receive from the EU's Energy Support Package for the Western Balkans worth EUR 1 billion created by the EU and its Member States to help the region overcome the energy crisis and the major energy prices increase caused by Russia's unjustified and unprovoked full-scale invasion against Ukraine.
