

How many solar panels will be installed on the Lego's factory roof?

o 20,000 solar panels will be installed on the roof of the LEGO's factory in Jiaxing, China. The panels will produce almost six gigawatts of energy per year. This is equivalent to the electricity use of more than 6,000 Chinese households.

How much energy does Lego use?

The total output from the investments by the LEGO Group in renewables now exceeds the energy consumed at all LEGO factories, stores and offices globally. In 2016, more than 360 gigawatt hours of energy were used by the LEGO Group to produce the more than 75 billion LEGO bricks sold around the world during the year.

Does Lego have solar panels?

LEGO has a wind turbine kit, modern home with rooftop solar kit, and several LEGO spaces kits with solar panels. My kids and I built the International Space station kit shortly after it was introduced in February 2020, then bunkered down in the spring to watch (and occasionally re-watch) LEGO Masters.

How much solar power does Lego have in 2023?

In 2023, LEGO's total maximum solar capacity across these locations reached an impressive 15.6 MWp, representing a 16% increase compared to 2022. LEGO also aims to include on-site and off-site solar facilities in its new factories in Vietnam, where operations will begin in 2025, and Virginia, USA.

Where are Lego's new solar panels installed?

The new solar panels have been strategically installed on recently constructed buildings and previously unused rooftop areas, covering approximately 11,000 m² of space. LEGO's sustainability efforts extend far beyond the Kladno factory.

Should Lego cover all the energy expenditure completely off renewables?

For them to cover all that energy expenditure completely off renewables is huge! The total energy output from the investments now exceeds the energy consumed at all LEGO factories, stores, and offices globally.
