

Is resale of used solar panels a good idea?

In the solar industry, resale of used panels is just beginning to take off. Some solar equipment brokers have realized the economic opportunity of remarketing decommissioned solar panels.

Should I resell or recycle used solar panels?

The first step in your assessment to determine whether to resell or recycle used solar panels is to conduct a hardware audit. This step should ideally take place before decommissioning; however, you can still complete a thorough audit after the fact as well. While the PV system is still connected, inspect and test the modules.

Can solar panels be remarketed?

Some solar equipment brokers have realized the economic opportunity of remarketing decommissioned solar panels. "Non-shattered panels always have someone who's willing to buy them and put them back into use somewhere in the world," explained Jay Granat, owner of Jay's Energy Equipment, a wholesale solar brokerage firm.

Can silver be recycled to make new solar panels?

"Over 60% of the value is contained in 3% of the weight of the solar panels," he says. The team at Soren are hopeful that, in the future, nearly three-quarters of the materials needed to make new solar panels - including silver - can be recovered from retired PV units and recycled - to help speed up production of new panels.

Are more solar panels being put on British roofs?

One provider said this month it had seen enquiries about solar panels rise tenfold. "More solar panels are being put on British roofs than ever before," said Chris Hewett, chief executive of Solar Energy UK. The fact that renewable energy helps protect the planet has always made it an attractive option.

Is there a buyer for a used solar panel?

"If it's a working solar panel, there's always a buyer." In his 10 years of experience working in the secondary solar market, he has never seen such high demand for used panels than in 2020, and he expects demand to increase through the decade.
