

Is Lithuania a net energy importer?

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy. Long-term aims were defined in the National Energy Independence strategy in 2012 by Lietuvos Seimas.

What does the Lithuanian Ministry of energy do?

Its mission is to prosecute Lithuanian government policy in fuel, electricity, thermo-energy production and supply for Lithuania's economy. The current head of the Ministry is Dainius Kreivys. The Ministry of Energy was initially established on 17 January 1990 and its first minister was Leonas Vaidotas Asmantas.

Does Lithuania have an alternative energy supply?

Includes a market overview and trade data. Until a few years ago, Lithuania had no alternative gas supply or electricity interconnectivity with EU countries, except for limited interconnections with Latvia. In order to reduce Lithuania's dependence on energy supplies from a single source, the government implemented a number of projects.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Why is Lithuania investing in alternative energy import routes?

This is because ever since the reestablishment of its independence, Lithuania has been investing in alternative energy import routes. These included the development of the Butinge oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipeda LNG terminal and the Gas Interconnection Poland-Lithuania.

Does Lithuania have a nuclear power plant?

Visaginas 's Ignalina Nuclear Power Plant once provided 70% of Lithuania's electricity and exported energy to elsewhere in the Soviet Union. After the dissolution of the Soviet Union, the European Union required the country to commit to nuclear decommissioning in Visaginas for Lithuania to join.

The updated National Energy Independence Strategy was adopted by the Seimas today. The document aims to make Lithuania a fully energy independent country by 2050 that produces energy for its own needs ...
