

How many power plants are in Mauritius?

Mauritius has 23 utility-scale power plants in operation, with a total capacity of 989.3 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth

Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

How does Mauritius generate energy?

Mauritius generates energy through various means including wind farms, solar energy, biomass, wave, and waste-to-energy projects. Currently, bagasse (sugarcane waste) is the leading source, contributing 13.3 percent to the renewable energy generation. Mauritius derives other renewable electricity from hydro, wind, landfill gas, and solar.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m²/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

Could Mauritius become an LNG hub?

In early 2021, a feasibility study was conducted by PricewaterhouseCoopers India in the first phase to assess the potential of Mauritius becoming an LNG hub for the region. In May 2022, the CEB published a Request for Information (RFI) from potential developers for the supply of electricity through barge mounted LNG power plants.

What is the Smart Grid Roadmap for Mauritius?

The Smart Grid Roadmap for Mauritius was launched in December 2018 to help the CEB integrate new technologies in the power system, enhancing reliability, safety, and security.
